

STUDENT INSURANCE COVERAGE

Code **JLA** Issued **9/04**

Purpose: To establish the basic structure for the provision of and requirements for student insurance coverage.

The feeder districts offer and administer a low-cost accident insurance program for students. At the minimum, the insurance will provide accident coverage for students on the way to and from school, while they are at school, and whenever they are engaging in school-sponsored activities. All students at the center should obtain accident insurance from their feeder district.

The feeder districts require that all students participating in the following activities have accident insurance.

- interscholastic athletics on the varsity and junior varsity level and B teams
- intramural football
- high school band
- high school physical education
- vocational laboratory courses
- other offerings and courses as determined by the principal/director

The feeder districts will not require those students to have accident insurance if the student provides documentation from the parent/legal guardian stating that the student has adequate insurance coverage and does not wish to participate in the district accident insurance plan.
